

John Boaz Lee

jtlee@wpi.edu | johnboaz.github.io

Senior machine learning engineer and researcher working primarily on deep learning, sequence and graph modeling, representation learning, and data mining.

Education

- 08/2015—12/2019 **Ph.D., Worcester Polytechnic Institute**
Computer Science, GPA 4.0/4.0
- *Thesis:* Deep Learning on Graph-structured Data
 - *Committee:* Xiangnan Kong (advisor), Elke Rundensteiner, Yanhua Li, Ryan Rossi
- 06/2010—06/2012 **M.Sc., University of the Philippines – Diliman**
Computer Science, GPA 4.0/4.0
- *Thesis:* A Link Prediction Algorithm for Heterogeneous Bibliographic Information Networks
 - *Committee:* Henry Adorna (advisor), Prospero Naval Jr., Jaderick Pabico, Rommel Feria
- 06/2004—06/2008 **B.Sc., Silliman University**
Computer Science, GPA 3.1/4.0
- *Thesis:* Dumaguete e-Traveler – A Knowledge-based Decision Support System
 - *Advisor:* Dave Marcial

Experience

- 01/2020—Present **Facebook**
Senior Machine Learning Engineer, Menlo Park
- Recently working primarily on graph learning for ads retrieval and ranking. I have experience with a wide range of graph-based methods, including GNNs (\$31.5M/year in revenue), non-parametric algorithms like node2vec and Personalized PageRank (\$370M/year in revenue), and low-latency random walk methods that can serve real-time use cases (\$120M/year in revenue).
 - Led the effort to deploy user intent prediction models across 3 surfaces (jobs, marketplace, shops) for 13 separate use cases. Our models were found to be 24% better than existing methods. One notable adoption was for promotions targeting (\$2.4M/year in savings).
 - Launched >35 ML solutions for a wide variety of problems (product recommendation, multimodal topic prediction, scraping detection). Our anti-scraping models were instrumental in the takedown of 2 malicious third-party apps with >100M downloads.
 - Core code contributor to an internal PyTorch framework for sequence modeling.
 - Main responsibilities include building and maintaining data pipelines, performing adhoc data analyses, and building, testing, and deploying machine learning models.
- 06/2019—08/2019 **Facebook**
Machine Learning Researcher, Menlo Park (Internship)
- Deployed a recurrent pipeline which generated person-level graph embeddings for >1B users — leveraging their interactions from across FB's family of apps.
 - Demonstrated usefulness of approach by showing consistent AUROC gains across 9 tasks.

- 05/2018—08/2018 **Adobe**
Machine Learning Researcher, San Jose (Internship)
- Worked on a deep learning model for entity alignment which was deployed internally. This resulted in two research publications and a patent (approved in 2023).
- 05/2017—08/2017 **Xerox PARC**
Machine Learning Researcher, Palo Alto (Internship)
- Led a project on graph classification and collaborated on a second one on dynamic network representation learning. Published two research papers from these projects.
- 08/2015—06/2019 **Worcester Polytechnic Institute**
Research Assistant, Worcester
- Researched and developed deep learning techniques for various types of relational data. Results were published at top data mining venues like TKDE, TKDD, KDD, and CIKM.
 - Assisted professors in the following courses: Data Mining, Computer Networks, Software Security, Temporal Logic, and Theory of Computation (teaching assistant during initial two years at WPI).
- 10/2012—10/2012 **Nara Institute of Science and Technology**
Research Assistant, Nara (Internship)
- Proposed and built a system for automatic software patch reviewer recommendation.
 - Finished a draft research publication within a month, the paper was later accepted for publication and won a “Best Presentation Paper” award.
- 06/2012—07/2015 **Ateneo de Manila University**
Instructor, Metro Manila
- Taught the following college-level courses: Data Structures and Algorithms, Java Programming, C# Programming, Design Patterns, and Linux Systems Programming.
 - Coached, in a minor capacity, competitive programming team (13/53 in ICPC regionals).
- 06/2010—06/2012 **University of the Philippines – Diliman**
Instructor, Metro Manila
- Handled the following courses: C Programming, Software Engineering, Data Structures and Algorithms. Taught primarily to an audience without a computing background.
- 04/2008—04/2009 **Interprise Solutions**
Software Engineer, Cebu
- Designed and developed core tools used in the application development framework of an ERP system. Promoted after six months at the company.
- 04/2006—06/2006 **Neri & Hu Design and Research Office**
Software Engineer, Shanghai (Internship)
- Designed and implemented an in-house Inventory Management System from scratch.

Publications

Citation statistics available on [Google Scholar](#)

Published at top data mining venues including: KDD (3), SDM (3), TKDD (2), TKDE (1), and CIKM (1)

Patents: [US 11,544,535 B2](#)

TKDE'22 Role-based Graph Embeddings

N. K. Ahmed, R. A. Rossi, **J. B. Lee**, T. L. Willke, R. Zhou, X. Kong, H. Eldardiry
IEEE Transactions on Knowledge and Data Engineering. 2022.

KDD'21 Energy-efficient Models for High-dimensional Spike Train Classification using Sparse Spiking Neural Network

H. Yin, **J. B. Lee**, X. Kong, T. Hartvigsen, S. Xie
ACM SIGKDD International Conference on Knowledge Discovery and Data Mining. 2021.

- KDD'20* Recurrent Networks for Guided Multi-Attention Classification
X. Dai, X. Kong, T. Guo, **J. B. Lee**, X. Liu, C. Moore
ACM SIGKDD International Conference on Knowledge Discovery and Data Mining. 2020.
- TKDD'20* On Proximity and Structural Role-based Embeddings in Networks: Misconceptions, Techniques, and Applications
R. A. Rossi, D. Jin, S. Kim, N. K. Ahmed, D. Koutra, **J. B. Lee**
ACM Transactions on Knowledge Discovery from Data. 2020.
- SDM'20a* Deep Parametric Model for Discovering Group-cohesive Functional Brain Regions
J. B. Lee, X. Kong, C. M. Moore, N. K. Ahmed
SIAM International Conference on Data Mining. 2020.
- SDM'20b* Dual-Attention Recurrent Networks for Affine Registration of Neuroimaging Data
X. Dai, X. Kong, X. Liu, **J. B. Lee**, C. Moore
SIAM International Conference on Data Mining. 2020.
- TKDD'19* Attention Models in Graphs: A Survey
J. B. Lee, R. A. Rossi, S. Kim, N. K. Ahmed, E. Koh
ACM Transactions on Knowledge Discovery from Data. 2019.
- CIKM'19* Graph Convolutional Networks with Motif-based Attention
J. B. Lee, R. A. Rossi, X. Kong, S. Kim, E. Koh, A. Rao
ACM International Conference on Information and Knowledge Management. 2019.
- ANS'19* Learning Compact Graph Representations via an Encoder-Decoder Network
J. B. Lee, X. Kong
Applied Network Science. 2019.
- BigData'18* Dynamic Network Embeddings: From Random Walks to Temporal Random Walks
G. Nguyen, **J. B. Lee**, R. Rossi, N. Ahmed, E. Koh, S. Kim
IEEE International Conference on Big Data. 2018.
- KDD'18* Graph Classification using Structural Attention
J. B. Lee, R. A. Rossi, X. Kong
ACM SIGKDD International Conference on Knowledge Discovery and Data Mining. 2018.
- BigNet @ WWW'18* Continuous-Time Dynamic Network Embedding
G. Nguyen, **J. B. Lee**, R. Rossi, N. Ahmed, E. Koh, S. Kim
International Workshop on Learning Representations for Big Networks @ The Web Conference. 2018.
- SDM'17* Identifying Non-linear Contrasting Networks from Time-Series Data: Application to Brain Network Analysis
J. B. Lee, X. Kong, Y. Bao, C. Moore
SIAM International Conference on Data Mining. 2017.
- IWESEP @ APSEC'13* Patch Reviewer Recommendation in OSS Projects
J. B. Lee, A. Ihara, A. Monden, K. Matsumoto
International Workshop on Empirical Software Engineering in Practice @ Asia-Pacific Software Engineering Conference. 2013. (Best Presentation Award)
- JoC'13* Understanding the Behavior of Filipino Twitter Users during Disaster
J. B. Lee, M. Ybañez, M. M. de Leon, M. R. E. Estuar
Journal on Computing. 2013.
- CGAT'13* Characterizing Behavior and Features of Participants and Observers during Disaster on Twitter
J. B. Lee, M. Ybañez
International Conference on Computer Games Multimedia and Allied Technologies. 2013.

- ASONAM'12 **Link Prediction in a Modified Heterogeneous Bibliographic Network**
J. B. Lee, H. Adorna
International Conference on Advances in Social Networks Analysis and Mining. 2012.
- JUCS'12 **Uncovering the Social Dynamics of Online Elections**
J. B. Lee, G. Cabunducan, R. Castillo, F. G. Cabarle, J. A. Malinao
Journal of Universal Computer Science. 2012.
- JIP'12 **A Quantitative Analysis-based Algorithm for Optimal Data Signature Construction of Traffic Data Sets**
 J. A. Malinao, R. A. B. Juayong, E. R. F. Oquendo, R. M. U. Taldas, **J. B. Lee**, J. B. Clemente,
 M. S. Gaabucayan-Napalang, J. R. F. Regidor, H. N. Adorna
Journal of Information Processing. 2012.
- ASONAM'11 **Voting Behavior Analysis in the Election of Wikipedia Admins**
 G. Cabunducan, R. Castillo, **J. B. Lee**
International Conference on Advances in Social Networks Analysis and Mining. 2011. (Best Poster Paper)

Professional Service

- Program Committee* **WWW**: The Web Conference (2022)
- Committee* **CIKM**: International Conference on Information and Knowledge Management (2020)
- BigData**: IEEE International Conference on Big Data (2018, 2020)
- Journal Reviewer* **TKDD**: ACM Transactions on Knowledge Discovery from Data (2017, 2021)
- TNNLS**: IEEE Transactions on Neural Networks and Learning Systems (2021)
- VLDB**: International Journal on Very Large Data Bases (2020)
- TKDE**: IEEE Transactions on Knowledge and Data Engineering (2017)
- JUCS**: International Journal of Universal Computer Science (2012)
- External Reviewer* **KDD**: Conference on Knowledge Discovery and Data Mining (2016 — 2019)
- ICLR**: International Conference on Learning Representations (2018 — 2019)
- IJCAI**: International Joint Conference on Artificial Intelligence (2017 — 2019)
- ICDM**: IEEE International Conference on Data Mining (2019)
- SDM**: SIAM International Conference on Data Mining (2017 — 2019)
- NeurIPS**: Conference on Neural Information Processing Systems (2016, 2018)
- ASONAM**: Conference on Adv. in Social Networks Analysis & Mining (2017 — 2018)
- ICDE**: IEEE International Conference on Data Engineering (2017)
- AISTAT**: International Conference on Artificial Intelligence and Statistics (2017)
- CIKM**: International Conference on Information and Knowledge Management (2016)
- AAAI**: AAAI Conference on Artificial Intelligence (2016)
- Other* Application Reviewer, *Facebook PhD Fellowship – Applied Statistics* (2021)
- Application Reviewer, *Facebook Request for Proposal – Applied Statistics* (2020)

Awards

- 2018 **Graduate Research Innovation Exchange Awards Honorable Mention**, Worcester Polytechnic Institute CS Department
- 2013 **Best Presentation Award**, IWESEP: International Workshop on Empirical Software Engineering in Practice (awarded to a single paper at workshop)
- 2012 **Honors Graduate**, Phi Kappa Phi Honor Society (awarded to top 10% of graduating class)
- 2011 **Best Poster Paper**, ASONAM: International Conference on Advances in Social Networks Analysis and Mining (awarded to a single poster paper)

Relevant Skills

Programming Python, Java, C#, C, SQL (Presto, Spark), LaTeX

Frameworks PyTorch, TensorFlow, Keras, Airflow, scikit-learn, NumPy, SciPy, pandas, matplotlib

Tools Jupyter Notebook, VS Code, GNU Screen, Vim, virtualenv, Git, Mercurial
